

8 MUST-HAVE ERP FEATURES FOR FOOD AND BEVERAGE MANUFACTURERS

01 TOTAL ONE-UP AND ONE-BACK TRACEABILITY

You need to quickly isolate problems by accurately tracking individual ingredient lots, bins or finished packages as they flow through processing and distribution.

Plex gives you instant access to supply chain, production, inspection, genealogy and usage information.

Eliminate cumbersome manual tracking.

02 SUPERB QUALITY AND SUPPLY CHAIN MANAGEMENT

Product quality depends on visibility. You need a complete, real-time view of production quality across the supply-chain, from supplier operations through to 'next-step' customers.

Plex lets you comprehensively track quality and store data for audit.

Innovative tools help you achieve best practice.

03 PREVENTATIVE FOOD SAFETY CAPABILITIES

Only a comprehensive food safety management plan gives you vital control, embracing hazard analysis, critical control points plans, process flow charting, statistical process controls and e-signatures.

Plex delivers all this and more.

Move from a reactive to a preventative food safety culture.

04 IN-DEPTH BATCH RECIPE MANAGEMENT

You need to track the extensive data related to batch recipes – from descriptive information and technical properties to quantities, costing information and history.

Plex tracks information for every ingredient in every batch with clear alerts regarding possible allergens.

Rapidly access key data and store it for decades.

05 SMART ELECTRONIC DOCUMENT MANAGEMENT

Creating a streamlined paperless environment lets you fast-track communications with sales and accounting, accelerate operations, increase productivity and reduce human error.

Plex lets you produce and send e-files in any format, with revisions controlled in a smart document management system.

Create a complete product history record.

06 REAL-TIME INVENTORY OPTIMIZATION

Excess inventory and processing delay's can jeopardize product quality and safety as well as profit. That makes inventory optimization a vital ERP feature.

Plex lets you plan the just-in-time delivery using innovative Materials Requirements Planning (MRP) functionality.

Vital ingredients and raw materials, always at hand.

07 SINGLE-SOURCE SYSTEM INTEGRATION

You need one single-source system that can trace ingredient costs for individual products and product lines in real-time – integrated seamlessly with financials, production, quality and inventory.

Plex's unified solution frees data flows between production and accounting: no more tedious or patching or reporting reconciliation.

Gain one version of the truth.

08 INDUSTRY-STANDARD CUSTOMIZABLE BARCODING

Advanced label printing and barcode scanning lets you accurately check quality and cost across your entire product line and ensure that each product contains the right ingredients, added in the right sequence.

Plex's built-in customizable barcoding features support any format or symbology, meeting GS1 barcode and data standards.

Share information across your supply chain.

Built from the plant floor up for your needs

The Plex Manufacturing Cloud is built from the plant floor up — and enhanced directly by our food and beverage customers — so you gain all the benefits that a cloud solution dedicated to manufacturing can deliver.

See how Plex can transform your operations.
